I am a Frontend Engineer with a focus on designing clean, accessible and intuitive applications either for web or mobile, and I have an eye for design with a user-driven approach to development.

EXPERIENCE

Moment House, California, USA — *Software Engineer*

MARCH 2022 - MAY 2022

- Worked on implementing and migrating Momentum — Moment House's in-house Design System from version 1 to version 2.

Brass, Lagos, Nigeria — *Frontend Engineer*

SEPTEMBER 2021 - MARCH 2022

- Worked on the rebranding of Brass website to improve user experience and better represent our product offerings.

- Worked in the Technical Product Team on services and integrations with our products and to provide support for our customers.

Helicarrier, Lagos, Nigeria — *Frontend Engineer [Contract]*

APRIL 2021 - NOVEMBER

- Worked on useRamp, a platform for Nigerians to fund and withdraw from their USDT wallet. A total volume of $60,000 over 400 transactions was processed before it is disabled.

- Worked on Sherlock, a platform that allows creators to show the proof of authenticity of their NFTs.

Bloc, Lagos, Nigeria — *Frontend Engineer [Contract]*

MARCH 2021 - OCTOBER 2021

- Worked closely with the brand team to develop the website for the rebrand from TechAdvance to Bloc.

- Worked closely with the marketing team to build landing pages for Baiya, BancCorp Microfinance Bank and EaziRemit.

Conectar LLC, Moscow, Russia — *User Interface Engineer*

NOVEMBER 2020 - MARCH 2021

- Implemented a design system optimized for accessibility to enforce consistency across the application.

- Reduced page load time by 60% for the Home, Authentication,

TECH STACK

React | Gatsby | NextJS | Apollo + GraphQL | Prisma | Redux | Mocha | Cypress | Storybook | SCSS | Styled-Components | Radix | Stitches

INTERESTS

User Interface | Accessibility | Software Architecture and Design | ThreeJS | WebGL | Animations | Micro-interactions.

Messaging, Whiteboard and Call pages by refactoring and redesigning the screens.

– Introduced consistent coding conventions and standards across the application.

– Collaborated with the Ul/UX team on product creation and handover to the development team.

– Worked on creating easier onboarding for new team members.

[Mkobo Microfinance Bank](#), Yaba, Lagos — *Software Engineer*

NOVEMBER 2019 - JUNE 2020

– Responsible for developing and maintaining iOS and Android applications for Mkobo Microfinance Bank with React Native.

– Improved the usability of the existing workflows by fixing several workflow bugs and UI issues based on user interviews, contextual inquiry and observations apart from user-reported bugs.

– Responsible for maintaining Quality Assurance for Festivesave.

– Implemented a CI/CD pipeline with Bitbucket to reduce the time it takes to build apps and test for changes.

– Embarked on a Product Market Research for Payflow.

– Collaborated on the Product Design for Payflow with Figma.
